PROFESSIONAL SUMMARY

Informatics Engineering graduate with a GPA of 3.62/4.00 and practical experience in technical support, operational coordination, web development, and data analysis. Experienced in troubleshooting technical issues, monitoring operational data, maintaining website content, managing structured records, and developing web-based applications. Proficient in Python, PHP, SQL, WordPress, MySQL, Microsoft Excel, and Google Sheets. Strong in analytical thinking, problem-solving, technical documentation, and cross-functional communication. Capable of working independently and collaboratively in remote environments. Interested in contributing to technology, data, software development, and digital operations projects.

RELEVANT EXPERIENCE

PT TELKOM AKSES - Palangka Raya, Indonesia
Help Desk Provisioning & Migration | July 2025 - August 2026

- Handled provisioning and migration issues reported by internal teams through Telegram and internal ticketing systems.
- Monitored and documented operational issue statuses using Google Sheets, including pending, ongoing, completed, and fraud-related cases.
- Coordinated with help desk teams, field technicians, sales teams, and customer service representatives to support issue resolution.
- Escalated order-related problems, system bugs, and technical errors through internal reporting channels.
- Maintained accurate issue records and followed up on operational cases to support timely resolution.

TINGANG.ID - Palangka Raya, Indonesia
Junior Web Developer (WordPress) | July 2024 - August 2025

- Managed and maintained website content using WordPress CMS.
- Designed and adjusted website elements with attention to usability and user experience.
- Supported website projects through content implementation, layout adjustments, and copywriting.
- Contributed to website maintenance and project execution independently and collaboratively.

UNIVERSITAS PALANGKA RAYA - Palangka Raya, Indonesia
Laboratory Teaching Assistant | October 2023 - May 2024

- Assisted practical laboratory sessions in Web and Mobile Programming, Network Security, and Spatial Data Analysis and Modeling.
- Helped students understand practical assignments and resolve technical difficulties.
- Provided technical guidance and supported laboratory activities.

KOPERASI UPAYA UNIVERSITAS PALANGKA RAYA - Palangka Raya, Indonesia
IT Support & Web Developer Intern | August 2023 - October 2023

- Assisted with IT troubleshooting and technical support activities.
- Contributed to the development of a responsive web-based information system.
- Used PHP and CodeIgniter 4 for application development and MySQL for database management.

SKILLS

Technical Skills

- **Programming:** Python, PHP, SQL, HTML, CSS, JavaScript
- **Web Development:** WordPress, Laravel, CodeIgniter 4, Tailwind CSS
- **Database:** MySQL
- **Data Tools:** Microsoft Excel, Google Sheets
- **Data Analysis:** Data Processing, Data Cleaning, Data Analysis, Reporting
- **Technical Support:** Troubleshooting, Issue Tracking, Technical Documentation

Professional Skills: Analytical Thinking, Problem-solving, Communication, Teamwork and Collaboration, Time Management, Adaptability.

SELECTED PORTFOLIO PROJECTS

SQL Data Analysis Portfolio
GitHub: https://github.com/Res-ha/sql-data-analysis-portfolio

- Analyzed retail sales performance, customer growth, product categories, and customer retention using SQL.
- Applied filtering, aggregation, joins, and analytical queries to extract business insights.

Python Data Engineering & Machine Learning Portfolio
GitHub: https://github.com/Res-ha/python-data-engineering-ml-portfolio

- Completed Python-based data analysis and machine learning projects.
- Applied data processing, analytical techniques, and machine learning workflows.
- Documented project processes, technical challenges, and outcomes.

Gojek App Review Sentiment Analysis - *Academic Thesis Project*
GitHub: https://github.com/Res-ha/Analisis-Sentiment-Berbasis-Aspek-Topic-Modellling

- Conducted aspect-based sentiment analysis of Gojek application reviews collected from Google Play Store.
- Applied Python-based text processing, sentiment analysis, and topic modeling to identify user feedback patterns.

Live Sports Tracker
Live Demo: https://live-sports-tracker-zeta.vercel.app/

- Developed a web application displaying English Premier League 2024/2025 information.
- Integrated an external API to retrieve and display sports-related information.

Koperasi Upaya UPR Information System
GitHub: https://github.com/Res-ha/Koperasi-Berbasis-Website
Live: https://www.koperasiupayaupr.org/

- Contributed to the development of a responsive information system for organizational profiles, services, membership, and announcements.
- Used PHP, CodeIgniter 4, and MySQL.

EDUCATION

Universitas Palangka Raya
Bachelor's Degree in Informatics Engineering | September 2020 - June 2024
GPA: 3.62/4.00

SELECTED CERTIFICATIONS

- **Cybersecurity Essentials**, Cisco Networking Academy | November 2022.
- **Data Analytics Essentials**, Cisco Networking Academy | July 2024.
- **Data Analyst Python Track**, DQLab | August 2026
